Kobe, having developed as one of Japan's leading international port cities, is the place where the miraculous encounters await. Its unique geography surrounded by the Rokko mountains overlooking the harbor, and the Seto Inland Sea stretching out below, gives birth to the beef of unparalleled quality and the bounty from the ranch, the finest sake brewed with the Miyamizu water, and the oldest hot spa retreat in Japan with the traditional entertainment. Whether you are visiting for the first time or returning for another trip, Kobe always has something new to discover. Here are some of the most special experiences that Kobe is privileged to showcase.
